

## **Global Youth Climate Pact – GYCP**

### **• Project leaders:**

International Institute of Anthropology of Contemporary - IIAC - Edgar Morin Center - School of Advanced Studies in Social Sciences - EHESS / CNRS.

International Center for Comparative Environmental Law (association chaired by Professor Michel Prieur), University of Limoges.

Space Mendes France of Culture and Scientific Mediation, Poitiers.

And with the participation of several scientific institutions at the international level.

### **General context**

The World Climate Conference, held in Paris in December 2015, provided an interesting opportunity for the mobilization of young students, within the school context, to the topics of discussions related to the issue of global warming. Focusing on the transmission of knowledge among high school students, this project focuses on how young people perceive environmental issues, but also the means they deem necessary to develop or create solutions to provide answers. Organized in the form of civic and civic participation of young people, this project aims to create social awareness of their individual and ethical responsibilities.

### **Objective of the project**

Conscious that the school as a place of transmission of the knowledge of learning and socialization of young people participates in the construction of norms and representations, this approach will emphasize the networks of reciprocal exchanges of knowledge especially through the intermediate of collaborative digital tools such as crowdsourcing (e-democracy)

Several phases will guide the project:

- ✓ Awareness of high school students to climate issues through the intervention of scientists; in classrooms.
- ✓ Deepening discussions with researchers, teachers and students;
- ✓ A collection of high school students' proposals and their debates thanks to crowdsourcing tools and a participative methodology (discussion forum, focus group);
- ✓ Development and implementation of local projects by students;
- ✓ Sharing of experience and validation of the various proposals by all the high school students mobilized (at national and international level) and presentation of the proposals to the international conferences on climate change (COP) as part of a side event.

## List of High Schools participating in GYCP 2015-2018

### Etablissements scolaires participant au projet depuis 2015-2018

#### By geographical area/ Par région géographique

Latin America / Country Amérique latine/ Pays	Town /Villes	Number of high schools/Nombre des lycées
<b>Chile/Chili</b> 6 régions : Région d' Arica (Nord) Région Métropolitaine Région de Valparaiso (Centre) Région Maule (Sud) Région O'Higgin's Région Osorno Los Lagos (Sud Austral)	Arica/Parinacota Santiago Valparaiso Isla de Pascua Talca/Curepto San Fernando Isla Grande de Chiloé	5 lycées / schools 5 lycées / schools 5 lycées /schools 1 lycées / schools 5 lycées / schools 1 lycée /school 1 lycée / school Total : 23 Total élèves: 738
<b>Colombia / Colombie</b> 4 région : Région de Bogota Région de Cali Valle del Cuenca Région du Café Région de Guagira~ Municipice Cundinamarca	Bogota Cali Pereire Cabos de las Velas Guasca	4 lycées 2 lycées 2 lycées Communauté de jeunes indigènes et afro-décédant 12 écoles rurales Total : 20 Total élèves 585
<b>Brazil/ Brésil</b> 3 Etats : São Paulo Brasilia Acre	Périphérie Grand Sao Paulo Sao Paulo – Centre Por-do So/Sol Nascente Mancio Lima	4 lycées 1 lycée 1 école 1 école des élèves autochtones appartenant à la communauté Total : 6 Total élèves : 415
<b>Ecuador/ Equateur</b> Ville /Town Quito	Coming from different places, cultures and with different ages, interested in the	Youth Network "Integrated by Climate Change". Total: 100 jeunes

	current climate situation.
